# DREAM *Day*

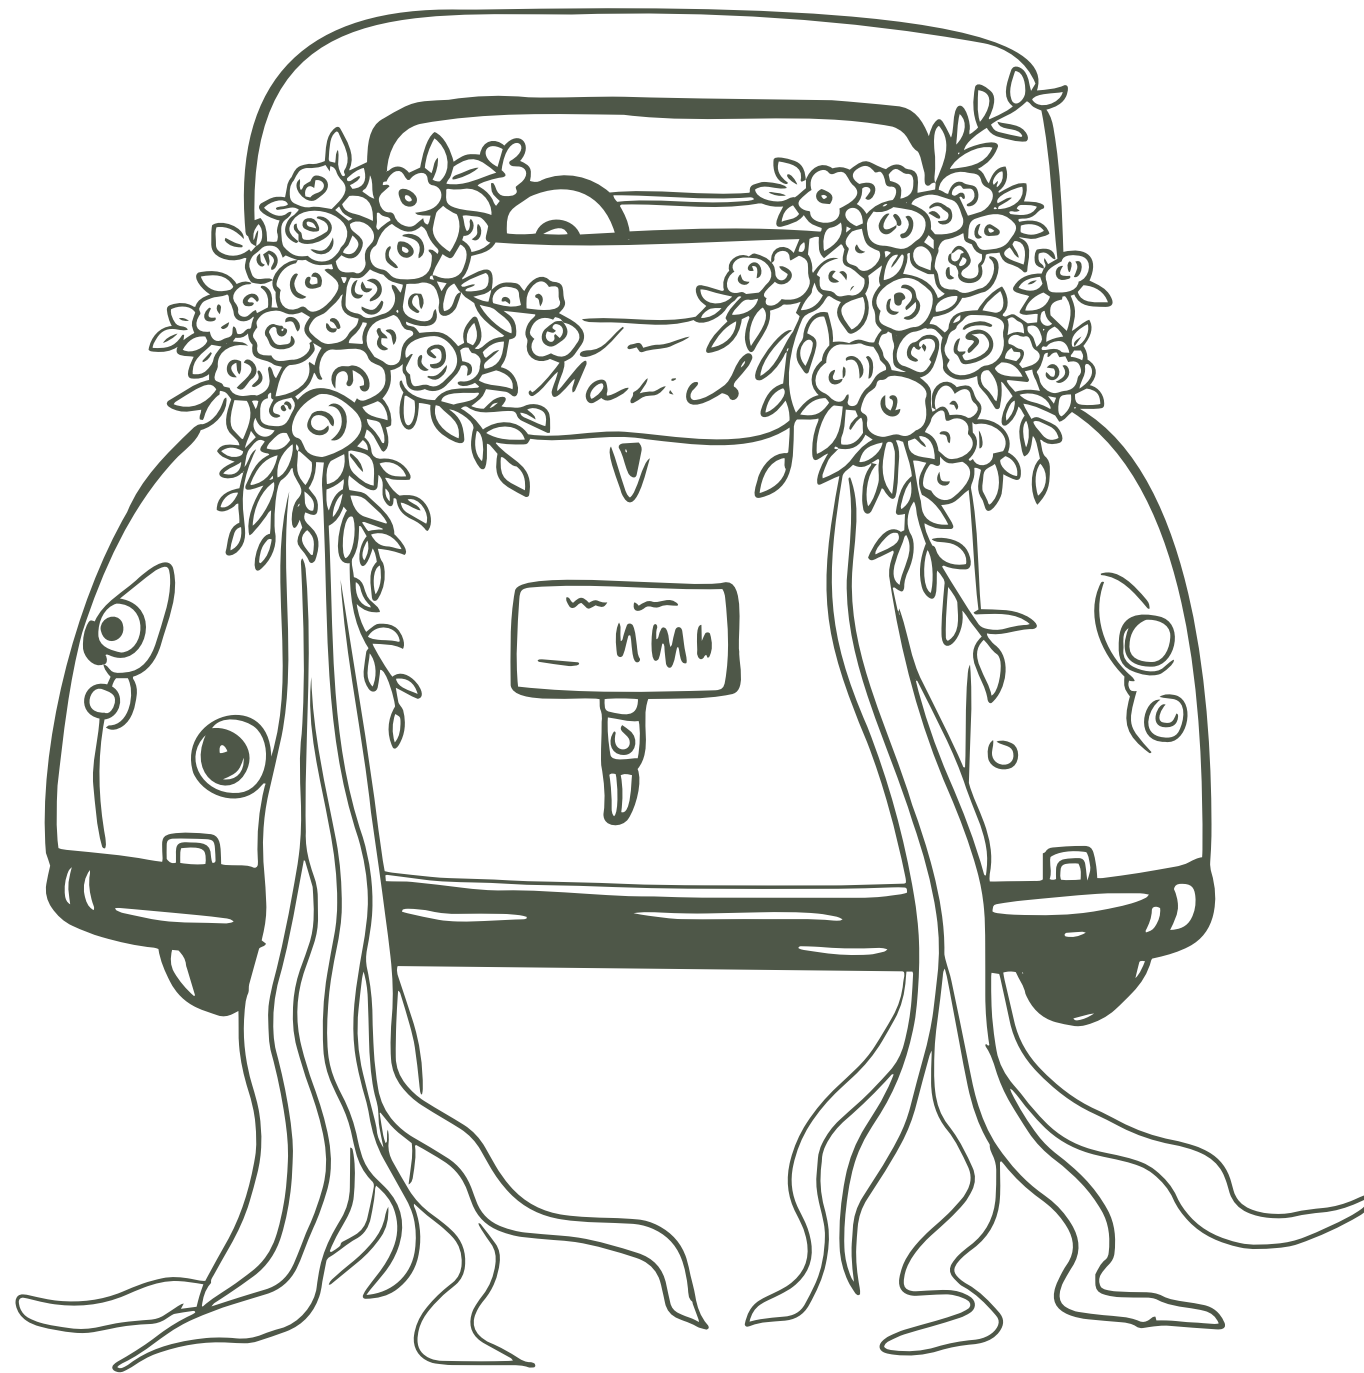

# Introduction

**This UX research analysis focuses on understanding user needs and behaviors related to our app. The goal of this study is to identify key pain points, expectations, and opportunities for improvement in order to enhance the overall user experience.**

**To achieve this, data was collected through our survey, targeting different ages . The analysis is based on responses from 10 participants.**

**This report presents the main findings, highlights recurring patterns, and translates them into actionable insights and user personas to support design decisions for the proposed solution.**

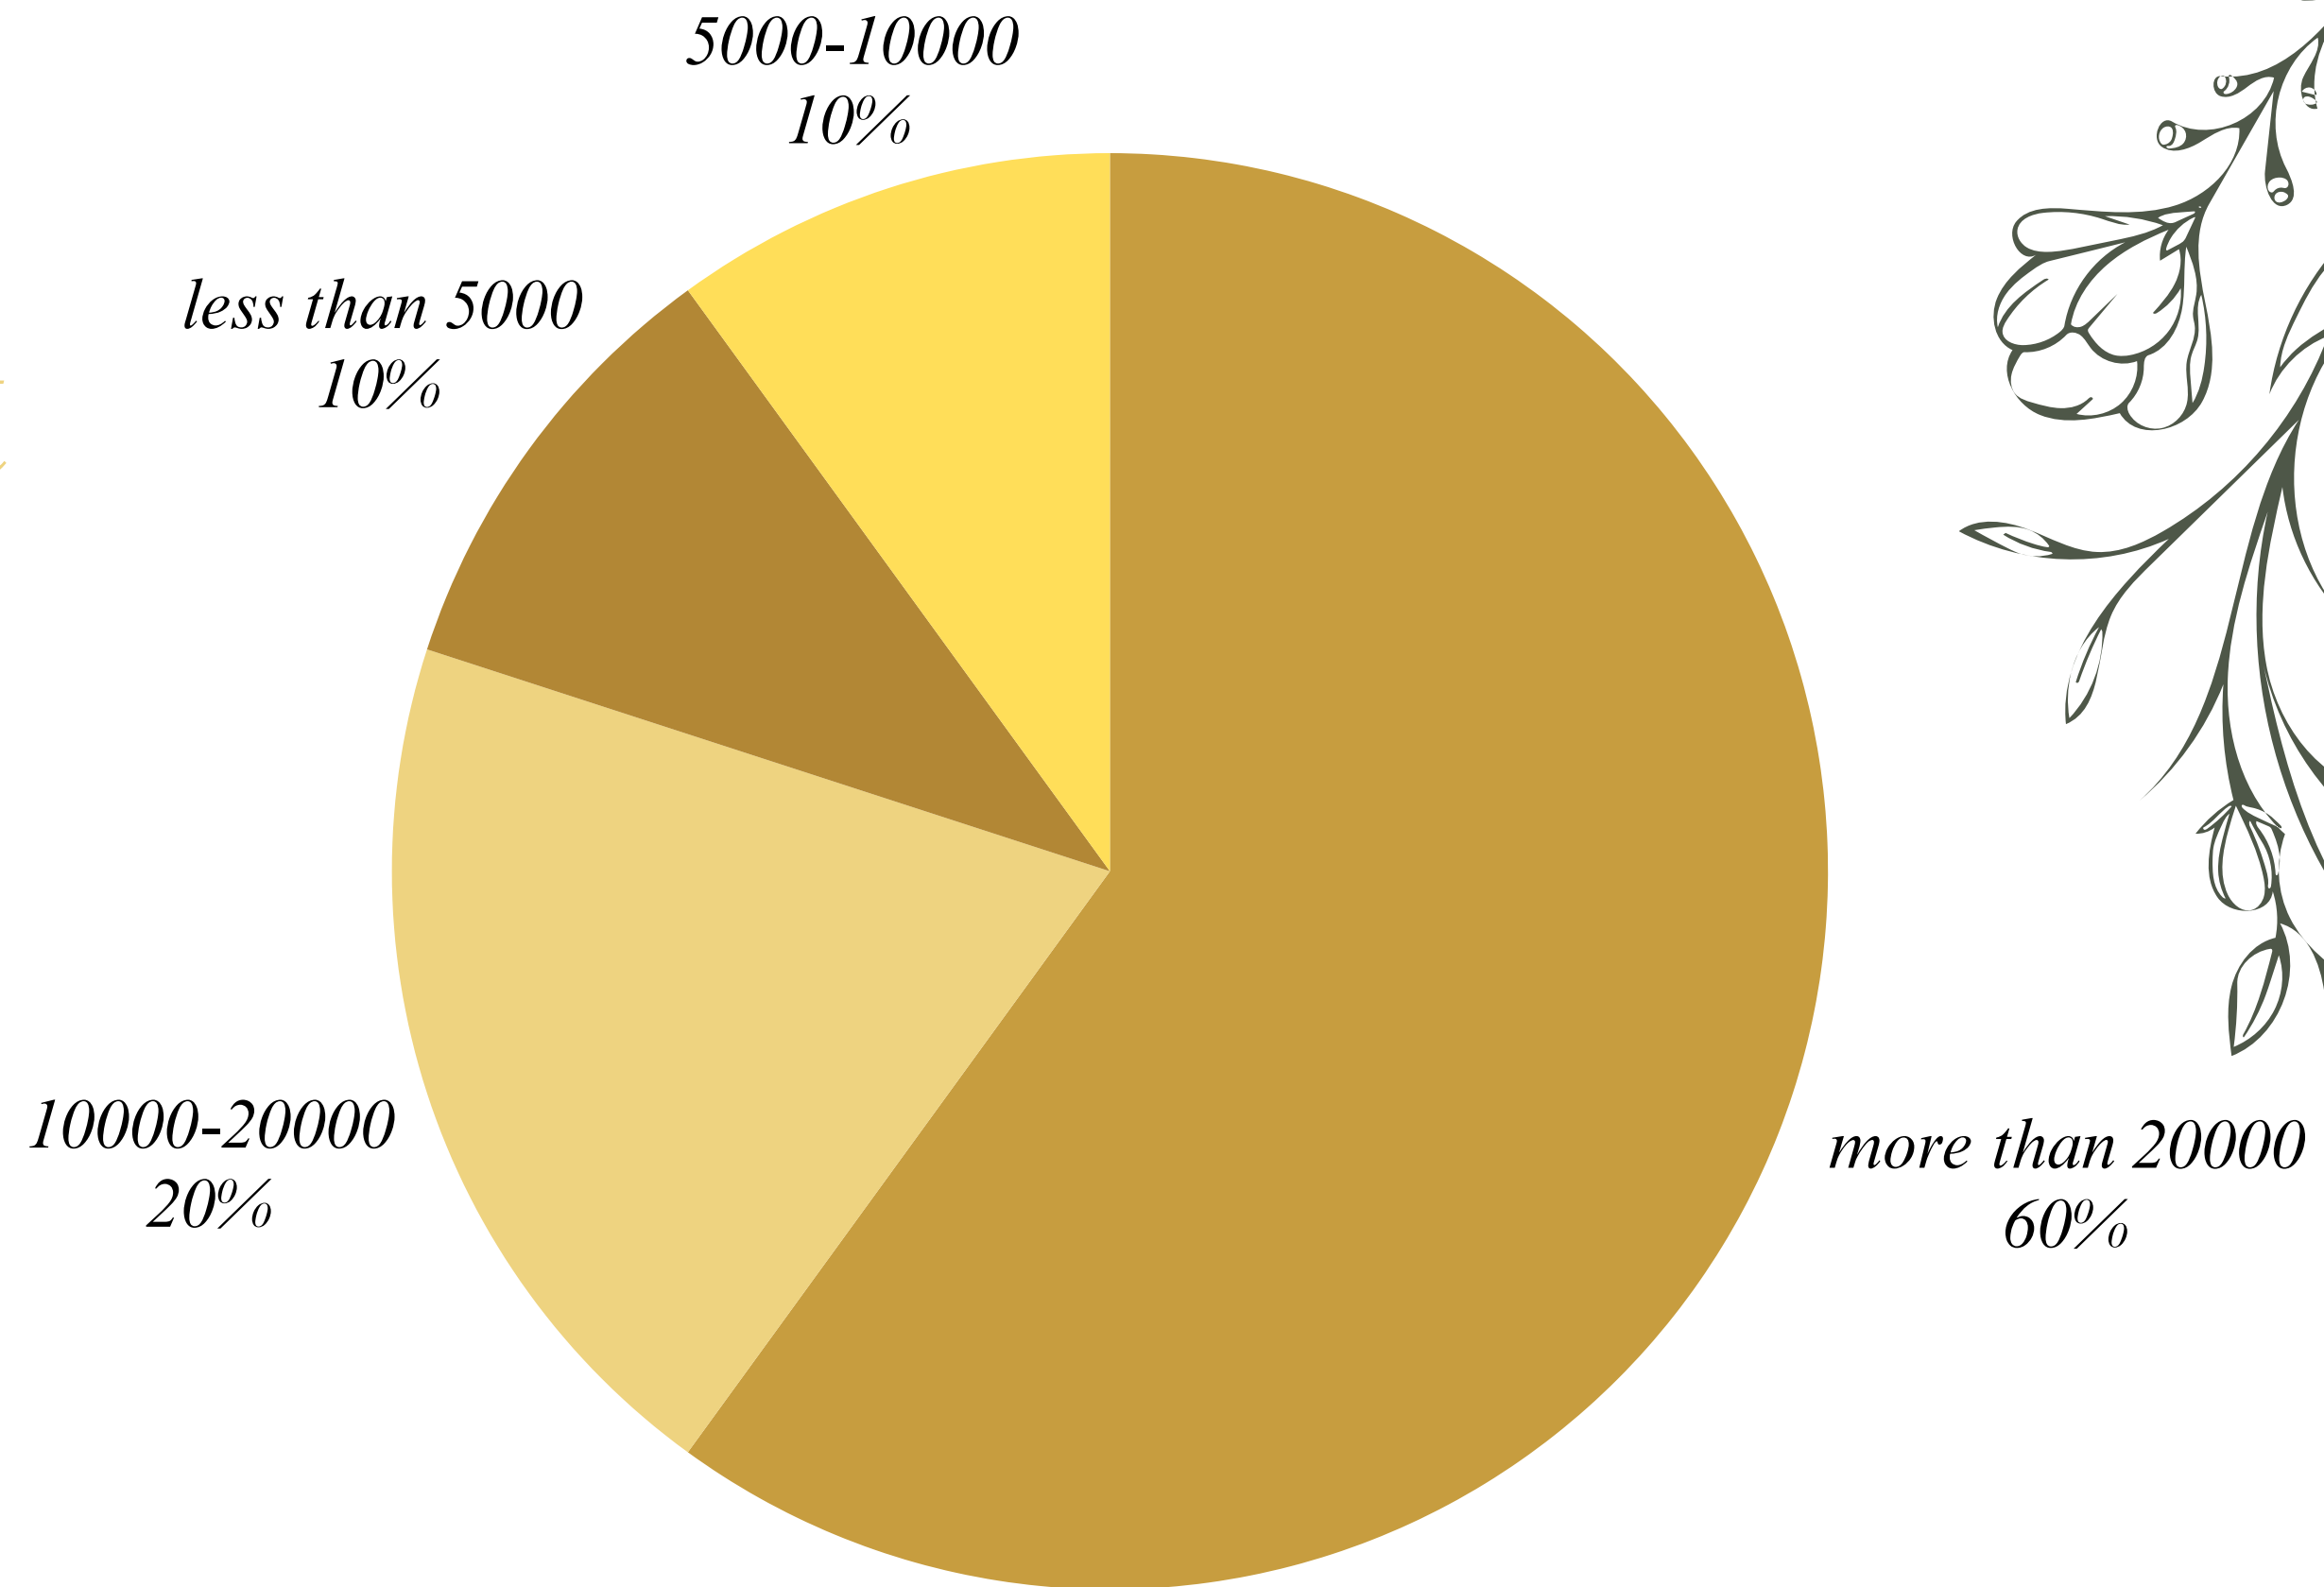

# Quantitative analysis

**Let's start by looking at  
what the numbers tell us.**

# Budget Management

Most people are willing to pay more than 20000 to have their dream wedding

# Wedding Planning Process

01

**PEOPLE WHO JUST  
STARTED (40%)**

03

**BOOKING SERVICES  
(10%)**

02

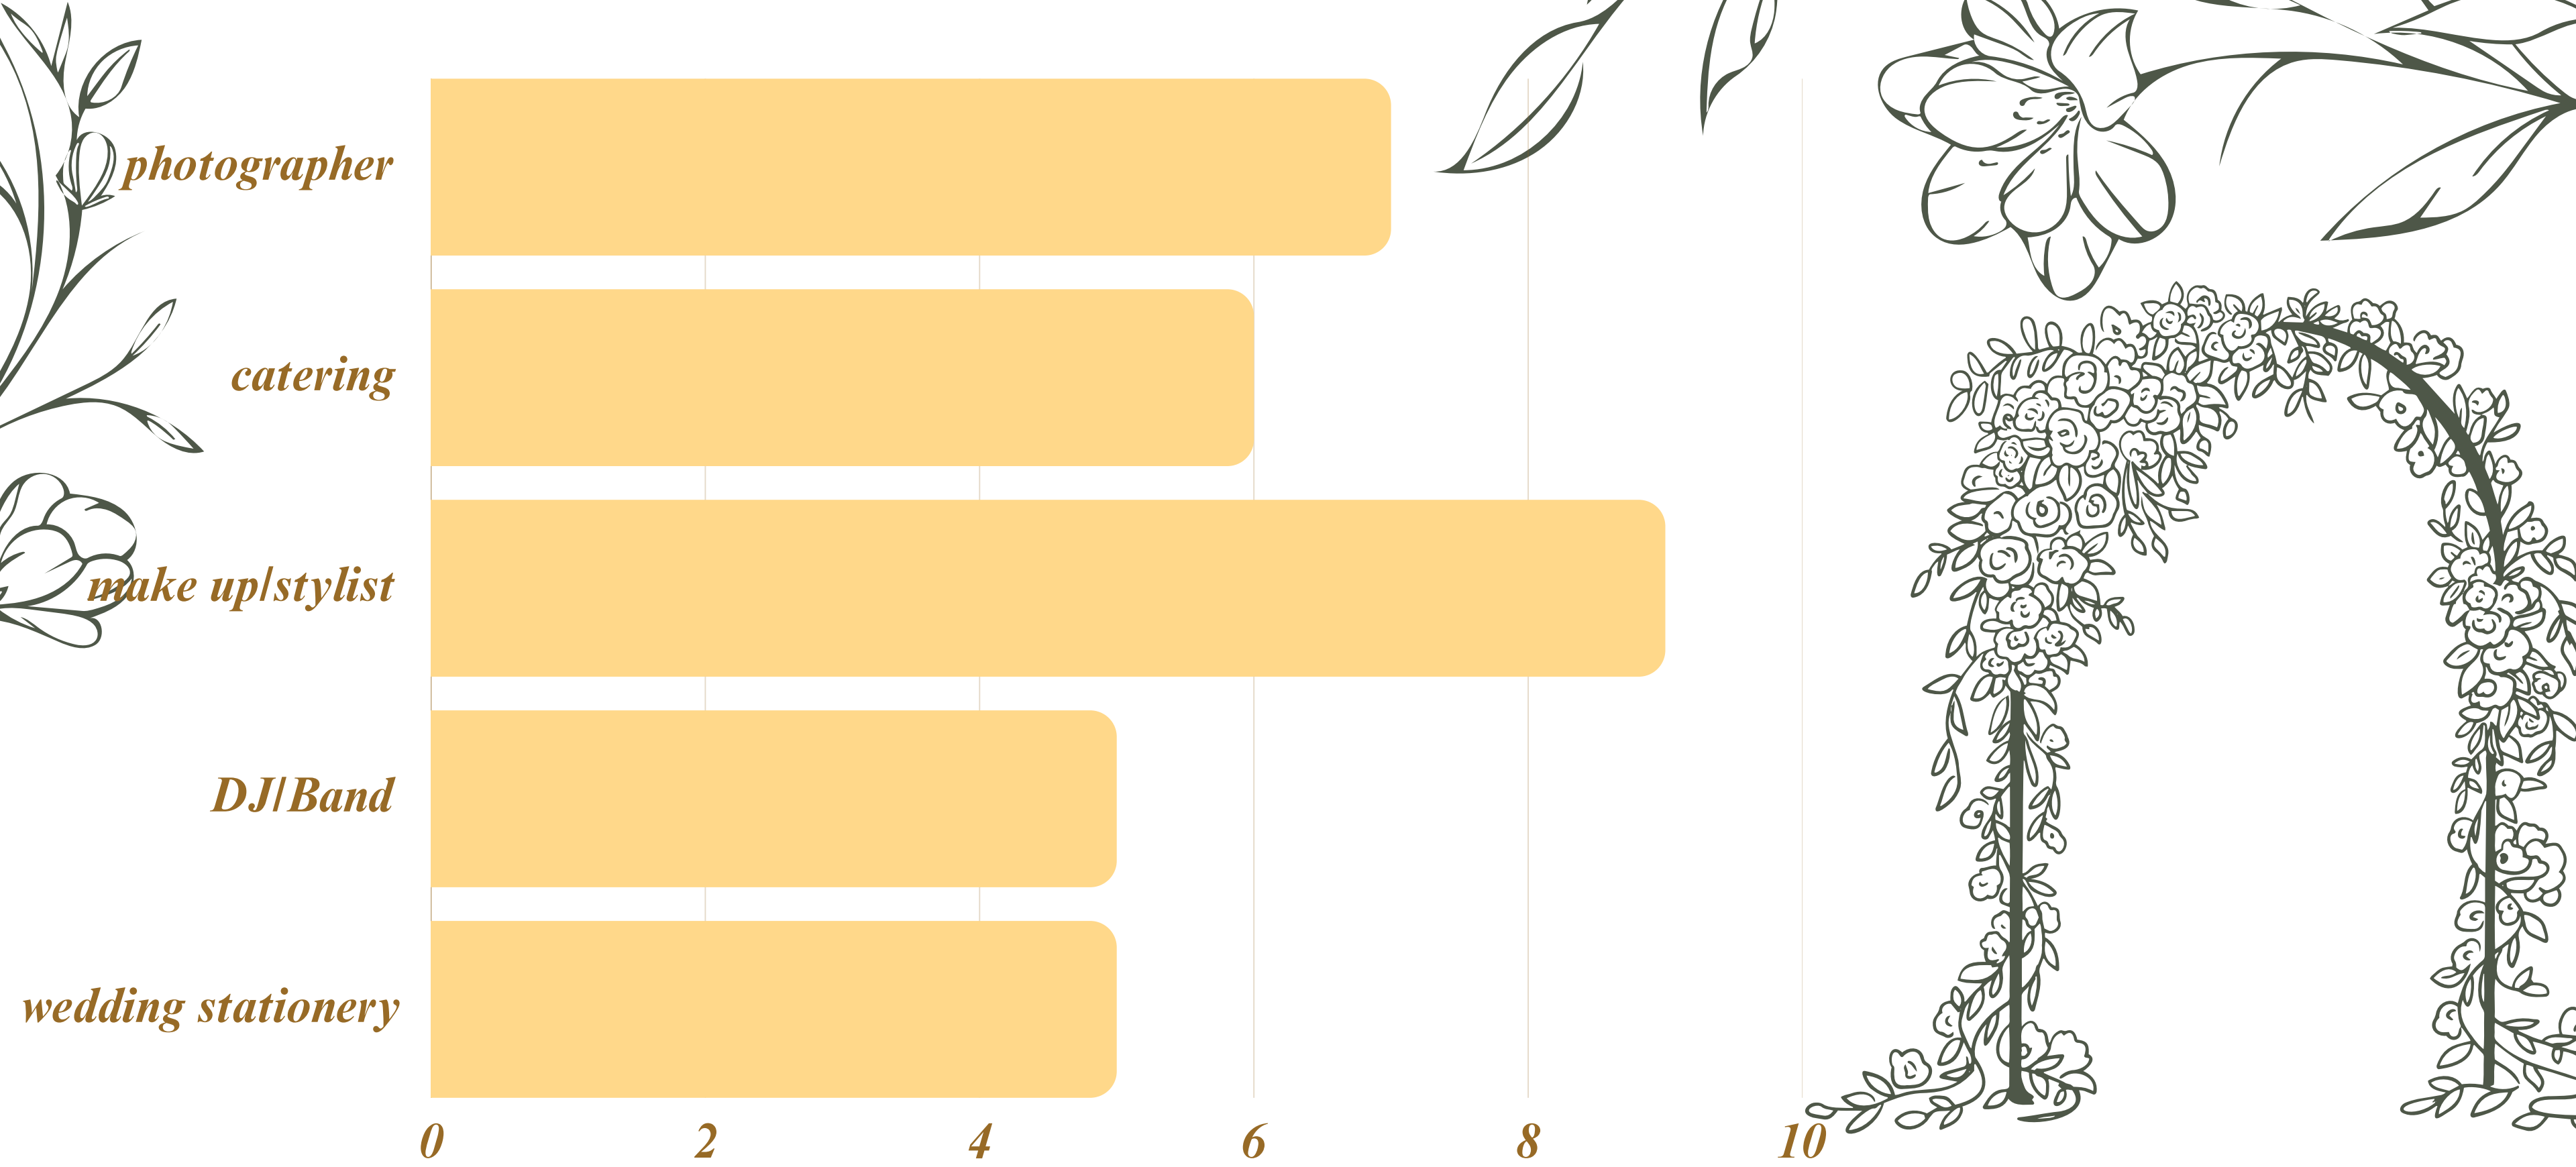

**SEARCHING  
VENDOR (40%)**

04

**ALMOST DONE  
(10%)**

Half of respondents are at the beginning  
of wedding planning.

# Qualitative analysis

**Now let's look beyond the numbers and focus on what users actually told us.**

# wanted features

01

## SAVING MONEY

a free app -discounts-  
good deals

02

## OPTIONS

various options to  
choose from

03

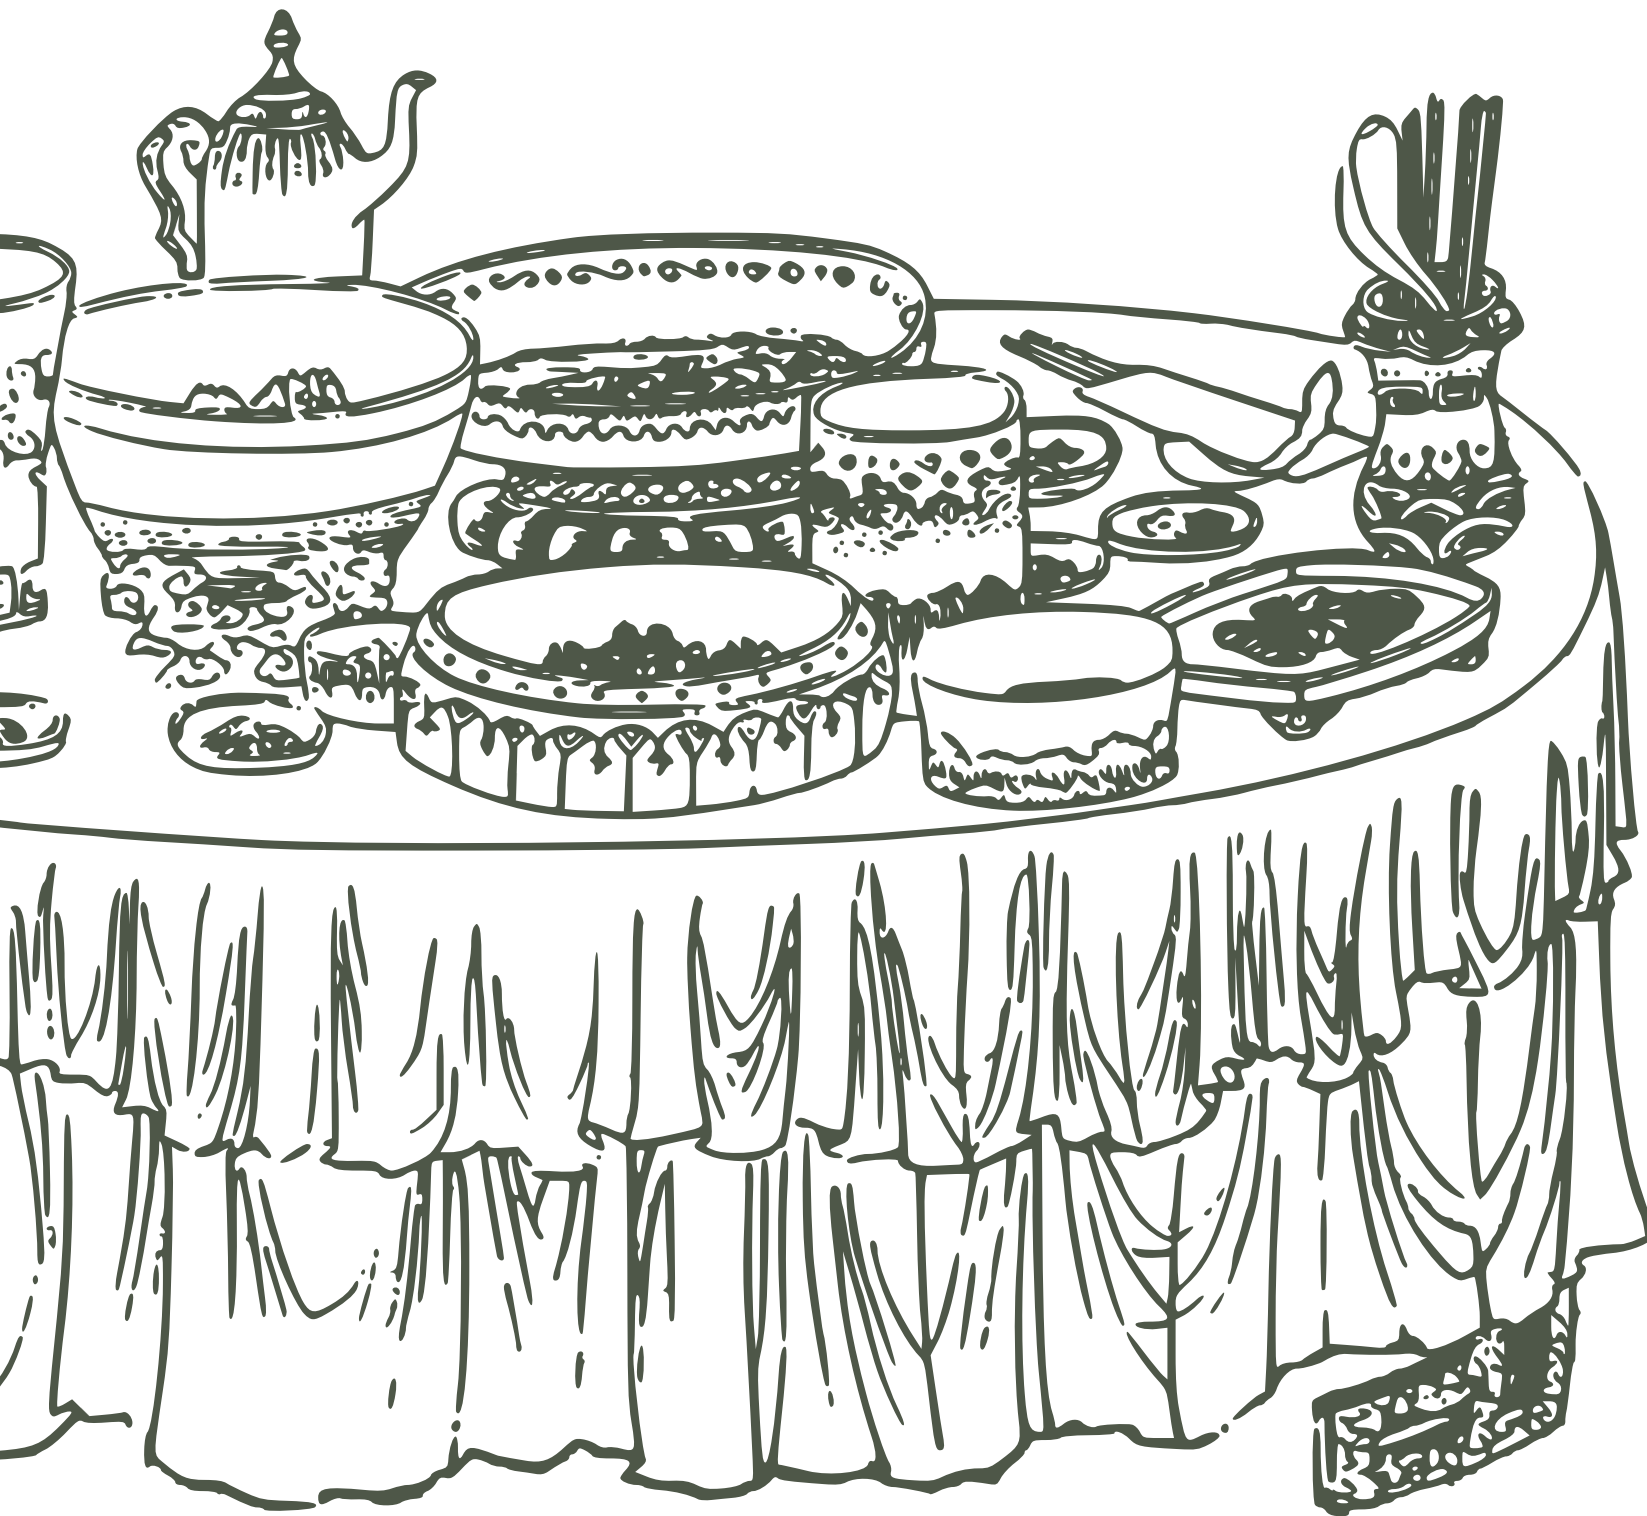

## VENDOR NETWORK

good feedbacks and  
comments

04

## ALL IN ONE APP

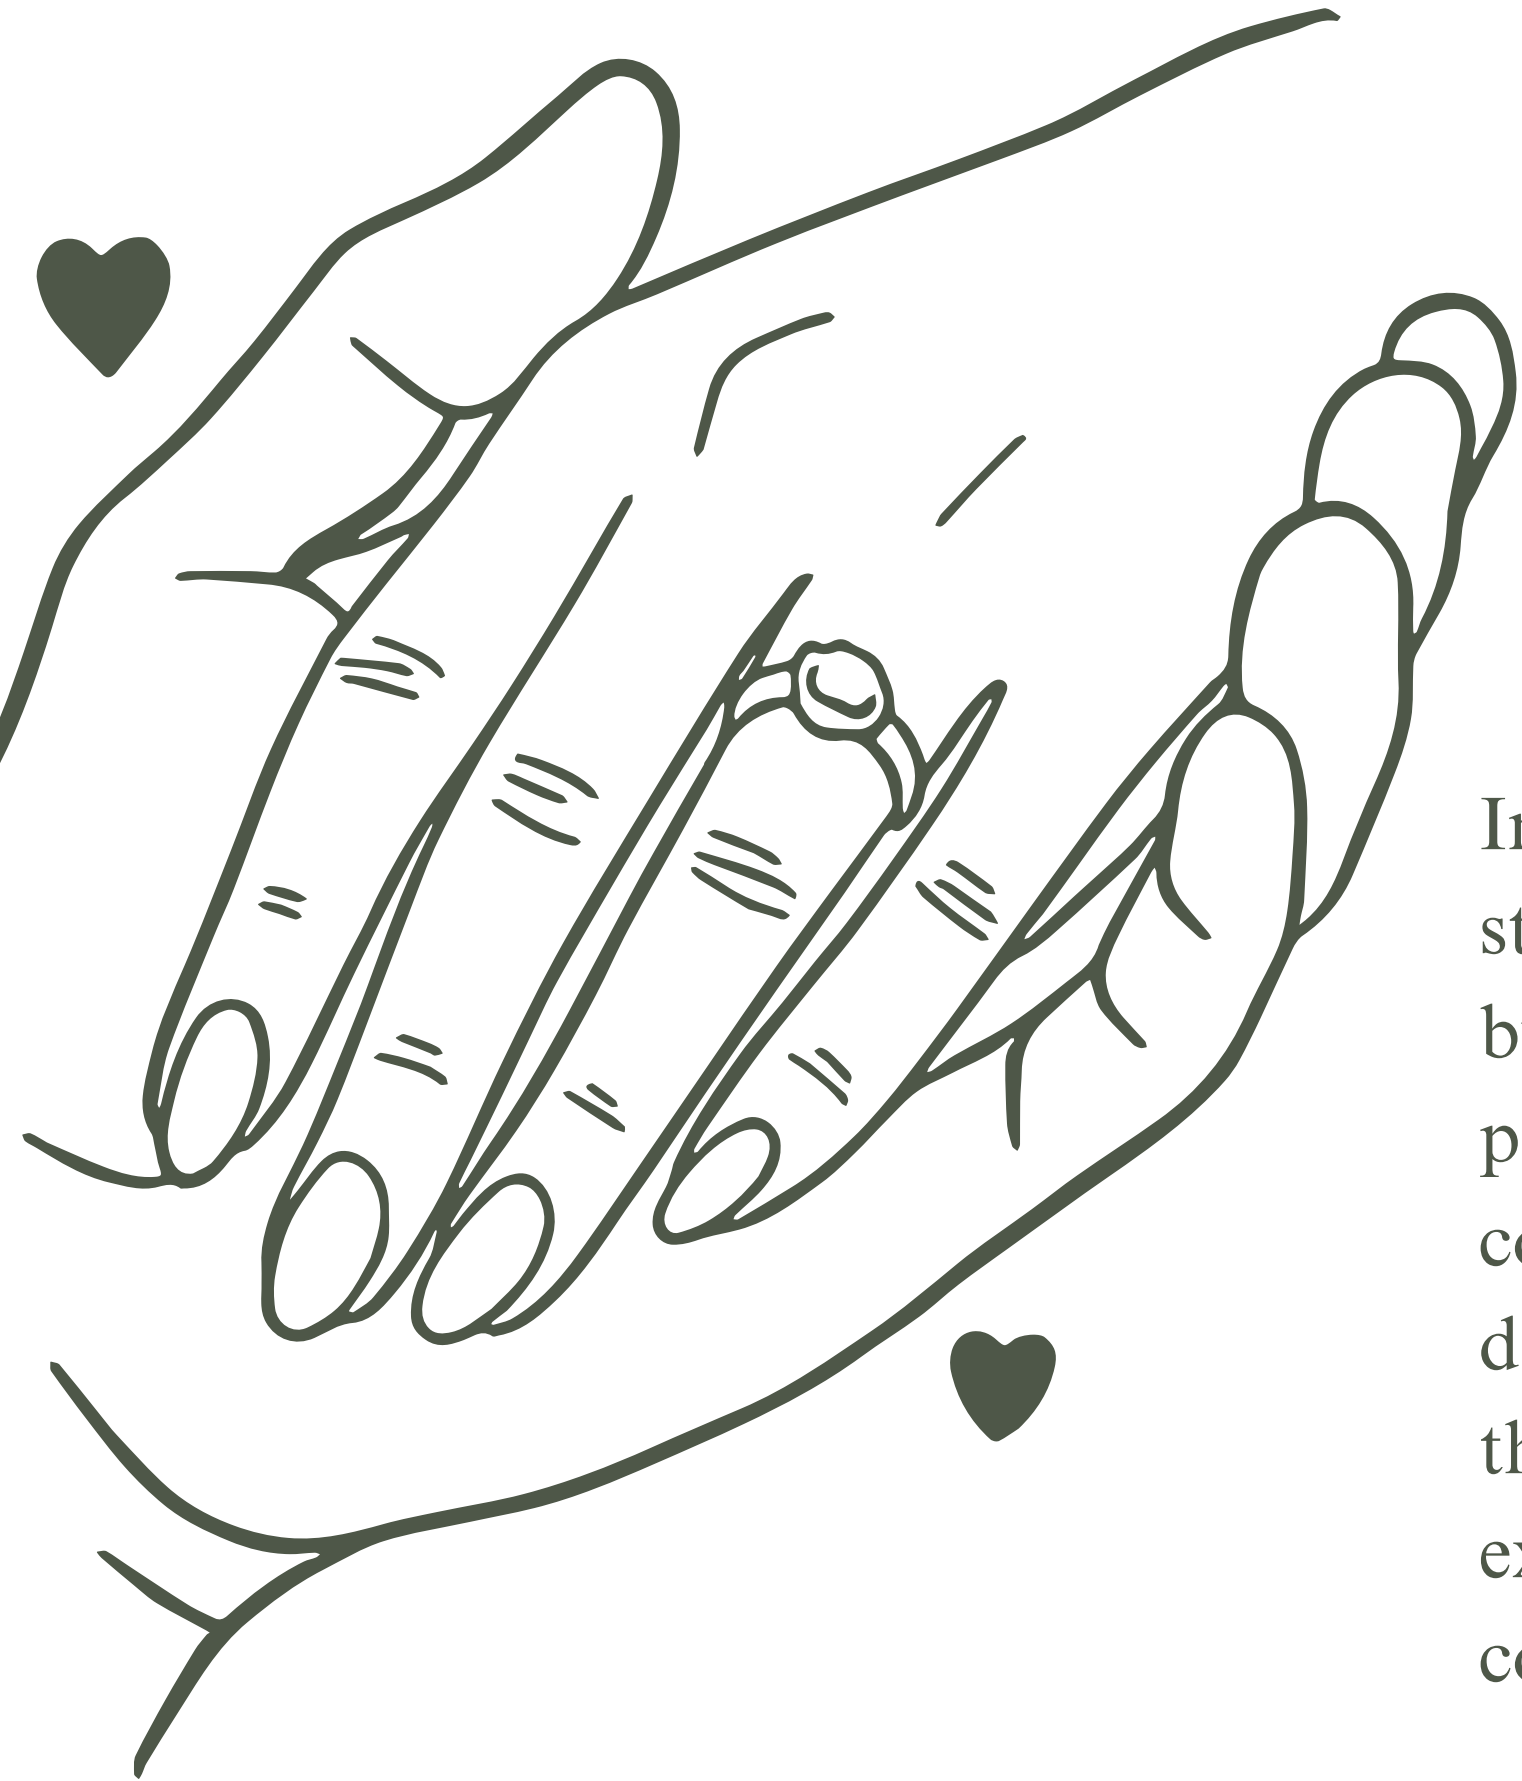

a platform providing  
everything needed

# Ideal Wedding

- ✓ VENUES
- ✓ DECORATORS
- ✓ PHOTOGRAPHERS
- ✓ CATERERS
- ✓ ENTERTAINERS

**Users mainly want trusted staff, along with a simple, stress-free planning experience. They also value smart organization tools, while good deals are a smaller priority.**

# Conclusion

In conclusion, our research shows that users struggle to find trusted vendors and manage their budget and time. Our app will solve these problems by offering verified vendors, smart comparison tools, and an all-in-one planning dashboard. Most importantly, we will focus on their dream of a simple, stress-free wedding experience—so they can enjoy the journey with confidence and peace of mind.

# PERSONA 1

## Persona Snapshot

**AMIRA ABIDI**

Age: 28      Gender: Female

Location: Tunis, Tunisia

Occupation: Marketing Executive

Amira is a busy professional who recently got engaged. She is overwhelmed by the scattered information on social media and struggles to manage her wedding budget while working full-time. She needs a simple, centralized solution to plan her dream wedding without the stress.

## Background

### Personality Traits

- Tech-savvy : Uses Instagram and Facebook daily for inspiration.
- Busy & Stressed : Has very little free time to visit vendors.
- Detailed-oriented : Wants everything to be perfect for her big day.
- Value-seeker : Always looking for the best quality-price ratio.

### Preferred Channels & Brands

- Instagram & Pinterest : For wedding themes and decor ideas.
- Facebook Groups : To read reviews about Tunisian vendors.
- WhatsApp : Primary tool for communicating with service providers.

### Goals

#### Primary Goals:

- Find a venue and a DJ within a 10,000 TND budget.
- Centralize all wedding tasks in one single app.
- Compare prices between different vendors easily.

#### Motivations:

- Desire for a stress-free planning experience.
- Need for transparency and trusted reviews.

### Challenges

#### Main Pain Points:

- Time Management : Difficulty coordinating vendor meetings.
- Budget Tracking : Hard to keep track of deposits and total costs.

#### Frustrations:

- Lack of a centralized platform in Tunisia.
- Having to jump between different social media apps to find info

# PERSONA 2

## Persona Snapshot

Ahmed Slimane

Age: 31

Gender: Male

Location: Sousse, Tunisia

Occupation: Software Developer

Ahmed is a pragmatic professional who values efficiency and authenticity over traditional extravagance. He and his fiancée want a meaningful, intimate wedding without the stress of overspending or managing hundreds of guests. He is tech-savvy and looks for tools that provide transparency and clear cost breakdowns.

## Background

### Personal Characteristics

- Pragmatic and budget-conscious.
- Values quality over quantity.
- Highly organized and data-driven.
- Prefers digital solutions over physical meetings.
- Stresses about hidden costs and traditional wedding "up-selling."
- 

### Hobbies and Interests

- Open-source coding and tech blogs.
- Hiking and outdoor photography.
- Minimalist interior design.
- Travel planning using budget hacks.

### Goals

#### Primary Goals:

- Organize a "Small & Chic" wedding for under 15,000 TND.
- Find a venue that allows for a simple ceremony.
- Avoid the social pressure of a "Grand Wedding."

#### Motivations:

- Investing saved money into a house or a honeymoon abroad.
- Reducing the environmental and logistical waste of large events.

### Challenges

#### Main Pain Points:

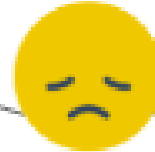

- Difficulty finding vendors who accept small-scale bookings.
- Lack of price transparency on current platforms (Mariages.net).

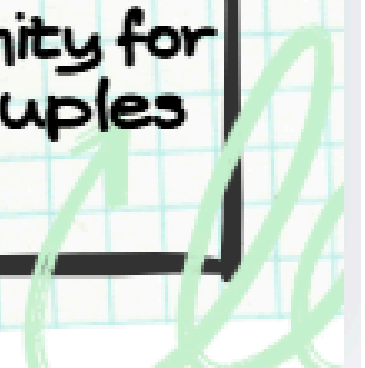

#### Frustrations:

- Receiving quotes that are 50% higher than the advertised price.
- Platforms that focus only on luxury weddings and ignore budget options.
